Summary

Computer Engineering graduate with a strong interest in software development, AI, and cloud technologies. Able to independently develop projects, learn new technologies, adapt existing solutions, and implement changes based on project requirements. Comfortable working independently or collaboratively with a team to solve problems, improve functionality, and build dynamic, flexible applications that address real-world needs. Eager to continuously learn, grow technically, and contribute to practical software solutions.

Technical Skills

Programming Languages: C, C++, C#, Python, TypeScript, JavaScript, SQL, HTML, CSS, Node JS

AI & Machine Learning: ML, Deep Learning, ANN, CNN, RNN, LLM, RAG, OCR, PaddleOCR, Tesseract

Frameworks & Libraries: ASP.NET Core, React, Angular, Vue.js, React Native, Flask, Open WebUI

Cloud & DevOps: AWS (EC2, S3, Lambda), Firebase, Docker, GitHub, GitHub Actions, Git, Appwrite

Databases & Tools: SQL Server, Firebase Firestore, MySQL, PostgreSQL, Vim, Postman, VS Code, Expo, Vector Databases

Knowledge & Soft Skills: Scenario Analysis, Workflow Design, System Integration, Manual Testing, OOP, Data Structures, Algorithms, REST APIs, Agile Teamwork

Experience

DigitalNext UAE / Remote
Consultant Developer *Mar 2026 – Present*

- Collaborating with cross-functional teams to design business scenarios and enterprise workflows, leading the ongoing development and architecture of the Sanadk platform.
- Analyzing existing system capabilities and tailoring solutions to ensure seamless execution of complex client requirements.

DigitalNext UAE / Remote
Software Developer (Freelance Contract) *Oct 2025 – Mar 2026*

- Worked collaboratively as part of a development team to analyze client scenarios and adapt current system infrastructure to match custom operational demands.
- Built comprehensive internal company systems for UAE Space, including a dedicated HR system and multiple workflow-driven modules, successfully completing the project.
- Performed rigorous manual testing, system validation, and workflow tuning to ensure all customer requirements were fully met.

Cyborg Automation Hub Jordan / on site
AI Developer & AI Engineer *Nov 2025 – Mar 2026*

- Developed AI solutions and automation systems for real-world applications using Machine Learning, Deep Learning, and LLMs.
- Worked with Vector Databases, RAG, and OCR pipelines to enhance system intelligence and data processing efficiency.

42 Jordan / on site
Software Engineer (Bootcamp Trainee) *Oct 2025 – Nov 2025*

- Completed an intensive, peer-to-peer ”Piscine” bootcamp focused on rigorous C programming and low-level system algorithms.

Wafra Kuwait / on site
Software Programmer *Nov 2024 – Apr 2025*

- Developed and maintained company systems using C++ and C Windows Forms, optimizing performance and reliability.

Orange Yarmouk Invention Lab (OYIL) Jordan / on site
Software Developer Trainee *Feb 2024 – Jul 2024*

- Developed web applications using ASP.NET Core, Angular, and SQL Server with integrated RESTful APIs.

Projects

Sanadk Platform Mar 2026 – Present
Enterprise Software, Workflow Design, Integration
- Developing and testing core platform features under DigitalNext starting from the end of Ramadan, aligning system workflows with complex business scenarios.

UAE Space Internal System Oct 2025 – Mar 2026
Internal HR Systems, Workflow Automation
- Built comprehensive internal solutions for UAE Space as a team, including a dedicated HR system and multi-department workflow modules, finishing by mid-Ramadan.

OpenWebUI Enterprise Extension Mar 2026
Svelte, Python, SQLite, Security Architecture
- Engineered an Offline License Enforcement mechanism for air-gapped environments with configurable user limits.
- Implemented an Auditable Activity Trail to track sensitive administrative actions via a custom frontend page.

Offline-Capable AI Service API Mar 2026
FastAPI, Docker, PaddleOCR, Local LLM
- Developed a containerized FastAPI service providing offline OCR and LLM inference packaged into a portable executable.

Multi-Store Platform May 2025 – Jun 2025
React Native, TypeScript, Firebase, Appwrite
- Built a cross-platform e-commerce solution supporting multiple storefronts with real-time inventory synchronization.

Drone Tracking System Jul 2025 – Jul 2025
React.js, REST API
- Built a real-time drone tracking dashboard integrated with maps and backend data feeds.

Issa Book Library Apr 2025 – May 2025
React.js, Firebase
- Created a private library app for managing and securing personal books.

Education

Yarmouk University Irbid, Jordan
B.Eng. Tech. in Computer Engineering *Sep 2019 – Jul 2024*

Certifications

- AI Academy Graduate – Cyborg Automation (2026)
- 42 Programming Training – Crown Prince Foundation (42 Irbid) (2025)
- Software Development Training – Orange Yarmouk Invention Lab (OYIL) (2024)
